

Nifty 100 Financial Intelligence

D-23 — Acceptance Checklist

Final acceptance checklist for the project implementation, analytics outputs, API, automated tests, documentation, and submission readiness.

ID	Acceptance Item	Evidence / Expected Result	Status
A-01	Database	financial_data.db exists and API health reports database=True.	PASS
A-02	Company universe	93 companies are available in the API / clustering output.	PASS
A-03	Financial ratios	1,582 financial-ratio rows available.	PASS
A-04	Company clustering	cluster_labels.csv contains 93 unique companies and 0 missing labels.	PASS
A-05	FastAPI import	API imports successfully and exposes 20 routes.	PASS
A-06	API health	/health returns HTTP 200 and database=True.	PASS
A-07	API summary	/summary returns project summary and database path.	PASS
A-08	Company endpoints	Company, latest, ratios, profitability, leverage, growth, cashflow and capital-allocation endpoints return 200.	PASS
A-09	Cluster endpoint	/companies/TCS/cluster returns a cluster label.	PASS
A-10	Sector endpoints	/sectors and sector-company endpoint return data.	PASS
A-11	Peer endpoint	/peers/TCS returns successfully.	PASS
A-12	KPI unit tests	4 Sprint-2 tests pass.	PASS
A-13	Pytest report	reports/pytest_report.html exists and contains the successful test run.	PASS
A-14	Analyst guide	docs/analyst_guide.pdf exists; verified file size 12,703 bytes.	PASS
A-15	Cash-flow outputs	cashflow_intelligence.xlsx, distress_alerts.csv and capital_allocation.csv are generated.	PASS
A-16	Cash-flow validation	Final cash-flow dataset is non-empty and required columns are present.	PASS
A-17	Documentation	Analyst guide and acceptance checklist are stored under docs/.	PASS

Final acceptance notes

- The latest automated test run completed with 4 passed tests and no failures.
- The API smoke test previously returned HTTP 200 for all 16 tested endpoints.
- D-22 analyst documentation has been verified in docs/analyst_guide.pdf.
- D-23 is intended as the final project acceptance record; any remaining dashboard/submission checks should be verified against the actual submission package before final handover.

Acceptance result: PASS for the verified implementation items listed above.
